

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

CHAPTER – 01

INTRODUCTION

1.1 – Project Overview

1. This project is about understanding housing market data using Tableau to find trends, patterns and connections between house prices and features. By making dashboards and visualizations users can see how things like house size, basement area, age, renovation history, bedrooms, bathrooms and floors affect sale prices.
2. The project turns raw housing data into insights with charts, graphs and dashboards. This helps homeowners, buyers, real estate agents and investors make decisions based on data.
3. Objectives
 - a. Analyze housing sale. Market trends.
 - b. Identify factors that affect property values.
 - c. Visualize housing features using Tableau.
 - d. Compare. Non-renovated properties.
 - e. Create dashboards for easy data exploration.
4. Key Visualizations
5. Count of Transformed Housing Data
6. Displays the number of housing records available in the dataset.
7. Helps understand size and coverage.
8. Average Sale Prices
9. Shows the selling price of houses.
10. Provides an overview of market value trends.
11. Area of House from Basement (Sqft)
12. Visualizes basement area distribution across properties.
13. Helps analyze the impact of basement size on house prices.
14. Total Sales by Years Since Renovation
15. Displays sales performance based on renovation timelines.
16. Helps determine whether renovated homes achieve sales values.
17. Distribution of House Age by Renovation Status
18. Compares the age of renovated and non-renovated houses.
19. Identifies renovation patterns among properties.
20. House Age Distribution by Bathrooms, Bedrooms and Floors
21. Examines how house age varies with features.
22. Helps understand property characteristics across age groups.
23. Tools and Technologies
24. Tool: Tableau

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

- 25. Dataset: Housing Market Data
- 26. Techniques: Data Cleaning, Data Transformation, Data Visualization, Dashboard Design
- 27. Expected Outcomes
 - a. Better understanding of housing market trends.
 - b. Identification of factors influencing house prices.
 - c. Interactive visual dashboards for decision-making.
 - d. Clear insights, into renovation impact and property characteristics.
