

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

TEAM ID	STWID2026-3387
PROJECT TITLE	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
MAX MARKS	4 MARKS

2.2 – Empathy Map Canvas

The **Empathy Map Canvas** helps understand the needs and behavior of users such as home buyers, sellers, investors, and real estate agents. It identifies what users **say, think, do, and feel** while analyzing housing market data. The project addresses their challenges by providing interactive Tableau dashboards that simplify complex data, highlight housing trends, and support informed decision-making. This user-centered approach ensures the dashboard is easy to use, insightful, and effective for analyzing sale prices and property features.

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

Empathy Map Canvas

Project: Visualizing Housing Market Trends. An Analysis of Sale Prices and Features using Tableau

1 SAYS

- Why are prices higher in some locations compared to others?
- Which house features increase resale value?
- Is this property overpriced?
- How have prices changed over the last few years?
- Can I compare multiple properties easily?
- I need reliable data before investing.
- Which area gives better returns?
- Are bigger houses always more expensive?

2 THINKS

- The housing market is unpredictable.
- There must be hidden factors affecting prices.
- Location plays a key role, but how much exactly?
- Market trends might indicate the right time to buy or sell.
- Visual charts would make understanding easier.
- Data can help reduce financial risk.
- I don't want to rely only on agent opinions.
- Seasonal trends may affect price fluctuations.

3 DOES

- Search housing listings online.
- Compare sale prices manually.
- Consult real estate agents.
- Analyze past transaction records.
- Use spreadsheets for comparison.
- Explore dashboards created in  **tableau**
- Filter properties by price, location, and features.
- Review market trend reports.

Target Users

First-time Home Buyers,
Property Sellers,
Real Estate Agents,
Data Estate Investors,
Data Analysts in Real
Estate Sector

4 FEELS

- Confused due to large datasets.
- Overwhelmed by too many options.
- Stressed about financial investment risks.
- Curious about market behavior.
- Skeptical about unclear pricing patterns.
- Relieved when seeing clear visual dashboards.
- Confident when supported by data-driven insights.

⚠ Pain Points

- Large and complex housing datasets
- Difficulty identifying key price-driving factors
- Lack of interactive visualization tools
- Time-consuming manual comparisons
- Unclear understanding of long term trends

★ Gains (Expected Benefits)

- Clear visualization of sale price patterns
- Easy comparison of housing features
- Identification of top price-influencing factors
- Better-timing decisions (buy/sell/invest)
- Reduced uncertainty in decision makes

How the Project Addresses User Needs

- Using  **tableau**, the project converts raw housing data into meaningful visual dashboards
- Highlights correlations between features and sale prices
- Uniquities projects manual data analysis, saving time and improving accuracy
