

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

TEAM ID	SWTID2026-3387
PROJECT TITLE	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
MAX MARKS	2 MARKS

5.2 – Sprint Delivery Plan

Sprint / Phase	Duration	Activities
Sprint 1 – Live Training Sessions	18 Days	Attend Smart Bridge live sessions to learn Tableau fundamentals, data visualization concepts, dashboard creation, storytelling, and project implementation.
Sprint 2 – Data Collection	1 Day	Collect the housing market dataset from Excel, CSV, or SQL sources and verify data completeness and quality.
Sprint 3 – Data Connectivity	1 Day	Connect the housing dataset to Tableau Desktop, configure the data source, and validate the imported data.
Sprint 4 – Data Preparation	1 Day	Clean the dataset by removing duplicates, handling missing values, correcting data types, and creating calculated fields.
Sprint 5 – Dashboard & Story Creation	1 Day	Develop Tableau worksheets, build an interactive dashboard, and create a Tableau Story to present insights.
Sprint 6 – Tableau Public Upload	1 Day	Publish the completed dashboard and story to Tableau Public and verify that all visualizations function correctly.
Sprint 7 – Web Integration	2 Days	Integrate the Tableau Public dashboard into a Flask-based website, ensuring responsive design and smooth navigation.
Sprint 8 – Documentation	3 Days	Prepare the project report, architecture diagram, methodology, screenshots, user guide, testing report, conclusion, and future scope.
Sprint 9 – Demo Video Creation	2 Days	Record and edit a demonstration video explaining the project objectives, dashboard features, visualizations, and key findings.
Sprint 10 – Project Deployment	2 Days	Deploy the Flask web application, test all modules, verify dashboard accessibility, and prepare the final project for submission.
