5.3 – Project Progress Tracking

Zoho Cliq is used as the primary collaboration and communication platform to monitor the progress of the project. It enables team members to communicate efficiently, share project updates, exchange files, assign responsibilities, and discuss technical issues in real time. Throughout the project, Zoho Cliq helps maintain transparency among team members and ensures that all development activities are completed according to the planned schedule.

A dedicated project channel is created in Zoho Cliq where all members participate in daily discussions, share development status, and coordinate project tasks. Regular updates are posted regarding data collection, data preparation, Tableau dashboard development, web integration, testing, documentation, and deployment. Team members use the platform to clarify doubts, resolve issues quickly, and collaborate effectively during each phase of development.

The platform also supports file sharing, making it convenient to exchange datasets, Tableau workbook files (.twb/.twbx), project documentation, screenshots, and presentation materials. Notifications and reminders help ensure that project milestones are completed on time and that no important tasks are overlooked.

By using Zoho Cliq for project progress tracking, the team maintains continuous communication with mentors and members, monitors task completion, identifies delays at an early stage, and improves overall project coordination. This collaborative approach contributes to the successful completion of the project within the planned timeline.

Activities Tracked in Zoho Cliq

- Daily team communication and discussions.
- Task assignment and progress monitoring.
- Sharing housing datasets and Tableau files.
- Discussion of dashboard design and visualizations.
- Tracking data preparation activities.

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

- Monitoring dashboard and storyboard development.
- Coordinating web integration tasks.
- Reviewing documentation progress.
- Sharing testing results and bug fixes.
- Preparing for final project demonstration and deployment.

Benefits of Using Zoho Cliq

- Real-time communication among team members.
- Centralized platform for project discussions.
- Easy sharing of files and project resources.
- Improved collaboration and coordination.
- Faster issue identification and resolution.
- Better tracking of project milestones and deadlines.
- Enhanced productivity through organized teamwork.
- Efficient communication with mentors and project guides.
- Simplified monitoring of project progress.
- Supports successful and timely project completion.
